

AI Mobile Engineer

Your mobile app can have a beautiful UI, but without a proper data layer,
it's just a design.

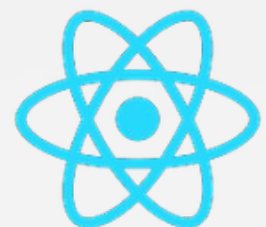

What is an API?

- API = Application Programming Interface
- Allows two systems to communicate
- Mobile App → API → Server → Database
- Sends requests and receives responses

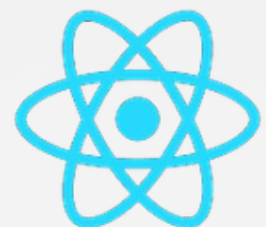

HTTP Methods

- GET → Read data
- POST → Create data
- PUT/PATCH → Update data
- DELETE → Delete data

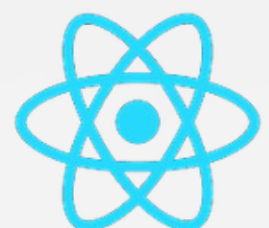

What is REST API?

- REST = Representational State Transfer
- Uses HTTP methods and URLs
- Works with resources
- Usually returns JSON

Fetch vs Axios

- Fetch → Built-in JavaScript API
- Axios → Popular HTTP client
- Axios provides simpler request handling
- Both can call REST APIs

Interceptors
Pagination
Infinite Scroll
Retry
Offline Queue
